24 March 2016

Dear Liz Butterworth

Please pass the following to the Parish Council members and members of the Neighbourhood Planning Group.

Unfortunately due to a lack of gigabytes in this area we are unable to access the Internet. We have continually complained to BT who claim they are addressing the problem and assure us the situation will be rectified as soon as possible.

We have followed with interest the latest Neighbourhood Planning Group, which replaced an organisation, chaired by Alan Griffiths of Wharf Lane Wilmcote. We recently received Update No. 6 and quite frankly we consider it a waste of time and effort.

The problem is the same as it has been for some considerable time. Namely parking on Station Road by people using the railway station and dog walkers taking their dogs for walks along the canal towpath.

Some time ago I wrote to a neighbour in Station Road thanking them for parking their visitor cars off the road thus making it easier for us in Wharf Lane to negotiate right and left turns safely into Station Road. I copied my letter to the Neighbourhood Planning Group, but did not receive a reply or even an acknowledgement.

What is urgently needed is car parking near to the station. Surely negotiations could begin with the Tuckers who live at Station House to sell a portion of their field alongside the station, which can be used as a parking area?

I look forward to an early response to this suggestion and the reason why it has not been implemented already.

Yours sincerely,
Mrs Sybil and Mr Bryan Stacey
